

3DM-HR

Photopolymer resin for high resolution prints

Our 3DM-HR is a high resolution photopolymer suitable to print miniatures and figurines at 25-50 microns resolution.

With his opaque aspect and his excellent surface definition, 3DM-HR reproduces high quality details to your models.

Our 3DM-HR resin is compatible for all SLA and DLP systems.

Suitable for :

Miniatures and figurines

SLA and DLP systems

Your benefits :

High resolution

High contrast

High precision

RESIN PROPERTIES

Aspect		opaque green
Viscosity	@ 30°C	60 MPa.s
Density	@ 25°C	1.15 g/cm ³
Hardness (shore D)		80
