Advanced Photopolymer Resins

3DM-DENT

Photopolymer resin for dental models

3DM-DENT was developed for dental model manufacturing. With his opaque aspect, this material is an ideal choice for printing dental models that they are used in laboratories.

3DM-DENT reproduces high details to your models and is highly recommended for printing dental models that are extremely accurate, which require a fine surface finishing and a high dimensional stability.

3DM-DENT also offers excellent strength and durability to your models.

Suitable for

Dental models
