

3DM-FLEX

Photopolymer resin for flexible parts

3DM-FLEX resin provide high flexibility characteristics suitable for a wide range of applications which require stretch and elasticity properties.

His flexible properties makes the 3DM-FLEX material ideal for use in animation, architecture, art, education, custom jewels and toys

Suitable for "

Animation

Architecture

Art

Education

Custom jewels

Toys

Your benefits :

High flexibility

Elasticity & stretch properties

Rubber like

RESIN PROPERTIES

Aspect		black
Viscosity	@ 30°C	130-140 MPa.s
Density	, 23.)	1.10 g/cm ³
Hardness (shore A)		7-
